

Did you know?

Monsanto's GE alfalfa has already been approved in Canada for human and environmental safety – but its not legal to sell the seed yet!

There is an injunction against planting GE alfalfa in the US that might end soon – Monsanto is taking this case to the Supreme Court on April 27!

You Can Take Action

- Check www.cban.ca/alfalfa for info and action.
- Buy organic food (GE is prohibited in organic farming) and other non-GE foods
- Subscribe to the CBAN News and Action Listserve

Happy Bee's Little Guide to Protecting Alfalfa

Tiny seed Big impact

What is alfalfa? :

- Sprouts for your sandwiches!
- Food for the soil – a nitrogen fixer!
- Nectar for bees – yummy honey!
- Great food for dairy cows.
- Nutritious food for beef cattle.
- Food pellets processed for export.
- Threatened by Monsanto's genetically engineered (GE) alfalfa...

Stop Monsanto's GE Alfalfa

Protect organic food and farming!

Protect organic food and farming!

You can sprout alfalfa at home!

All you need are:

- * seeds
- * glass jar
- * stocking or woven fabric or screen

STEP 1: Soak seeds overnight. Fill the jar quarter full with room-temperature water and let jar sit.

STEP 2: Pour out the water and let the seeds sit. The seeds need to be wet and have access to air. Don't let the seeds gather in clumps at the jar's bottom. You can roll the jar around, causing as many seeds to stick to the surface as possible, then lay the jar on its side.

STEP 3: Rinse seeds each 24 hours with cool water. Just run the water into the jar, swirl the seeds around, then pour out the water and repeat Step 2.

STEP 4: When sprouts are big enough spread them out and let the sun shine on them for a few minutes – activates enzymes = greener leaves.

You can stop GE alfalfa!

Stop the introduction of Monsanto's genetically engineered (GE) alfalfa.

Send a letter to the Minister of Agriculture with a tiny alfalfa seed or our seed graphic!

1. Print up the sample letter or write your own letter www.cban.ca/alfalfa
2. Buy some organic alfalfa seeds at your local health food store or use the seed picture.
3. Tape one or a few alfalfa seeds to your letter and include some free-floating seeds! (or use our drawing of the seed!)
4. Send to the Minister of Agriculture, Hon. Gerry Ritz, House of Commons, Ottawa, K1A 0A6 – **remember postage is free!**

Alfalfa seeds are tiny – help your MP understand why no one will be able to stop contamination if Monsanto's GE alfalfa is permitted in Canada.

For info and action: www.cban.ca/alfalfa
